1. The following is an examiner's statement of reasons for allowance: The closest prior art is Mills(US 5,753,659). The reference in column 8, line 50, column 7, lines 47-48 and column 4, lines 14 and 29-30 teach structurally similar compounds, especially when T is C. The difference between the reference and herein claimed compounds is that A1 is carboxyl in the reference as against substituted phenyl in herein. There is no motivation to arrive at the claimed compounds using the prior art, and hence instant claimed compounds, composition, method of making and method of use are novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
